Overview:

Ar. Kunal Bhattacharya not only gave the students a lecture, but also reviewed the work of the students and gave them his insights on the students work and design in a very positive and helpful manner. In his lecture, AR. Kunal Bhattacharya shared his profound knowledge and expertise in architecture, covering a range of topics that encompassed design principles, and what makes healthcare architecture so unique. His presentation not only provided theoretical insights but also drew from his extensive practical experience, offering a holistic view of architectural design.
