

Astha Khurana
(BAM 2006-09)

As a kid, I was fascinated with cartoons like tom & jerry but never knew what it is called and how these drawings move, that was a reason I was inclined towards sketching and was clear that I wanted to build my career in this stream. Was fortunate enough that I got to know about this course from a friend and enrolled in it. At that time animation was a booming industry and a new concept to many in my town. The course structure, faculties, and staff effectively contributed to the development of my skills. Until now I am in touch with few faculties and they still help me out on the professional front. I undoubtedly take pride in being alumni of BIT, Noida.

I am currently working with RICS SBE, Amity University as a content specialist in Audio- Visual communication. My role is to create engagement and awareness for the brand through motion graphics and animation videos.
